

# The World of Science and Nature

(RQ 3153)

Effective August 2025

**Description:** In a society where arguments and claims often rely on scientific and statistical studies, a fundamental understanding of the natural world and the scientific method along with their contributions to and impact on society is essential. Students should be able to evaluate scientific arguments using evidence-based reasoning.

Students will be able to:

1. Apply scientific method to test hypotheses, or
2. Analyze the structure and/or function of natural phenomena, or
3. Use quantitative methods as a tool to better understand the natural world
